Symposium on Probability Methods in Analysis

By Jean-Michel Morel

Springer Jan 1967, 1967. Taschenbuch. Book Condition: Neu. 235x155x18 mm. This item is printed on demand - Print on Demand Titel. Neuware - Remarques sur les Theoremes de Bochner et P.Levy.- Recent developments in axiomatic potential theory.- Über wesentlich indefinite Spiele.- La Topologie fine en Théorie du Potentiel.- Lois Stables et Espaces Lp.- Comments on the Martingale Convergence Theorem.- Faktorisierung von Differentialoperatoren.- Die Anzahl der Niveaudurchgänge und der lokalen Maximalstellen von Gaußschen Prozessen.- Vektorwertige Masse und Zufallsvariable auf Booleschen Algebren und der Satz von Radon-Nikodym.- Toward a theory of patterns.- On the potential theory of linear, homogeneous parabolic partial differential equations of second order.- Invariant and non-invariant measures.- Representation of abstract L-spaces.- Extension of stationary processes.- Renewal sequences and their arithmetic.- Optimal bounded control with linear stochastic equations and quadratic cost.- On a Fourier transform in infinitely many dimensions.- Some problems arising from spectral analysis.- Analytical methods in probability theory.- Martingales à Valeurs Vectorielles Application à la dérivation.- Atomes Conditionnels d'Espaces de Probabilité et Théorie de l'Information.- On Markov processes whose shift transformation is quasi-mixing.- Remarks on the Poisson process.- Sums of Markov-chains on finite semigroups.- On superefficiency.- Two explicit Martin boundary constructions.- Structure des Lois Indéfiniment Divisibles (=...

Reviews

This ebook is wonderful. I could comprehend every thing out of this created e ebook. I am just effortlessly can get a satisfaction of reading a created pdf.

-- **Federico Nolan**

This ebook could be worthy of a read through, and far better than other. I am quite late in start reading this one, but better then never. I realized this publication from my dad and i advised this publication to learn.
