Forgotten Books, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Proceedings of the California Academy of Sciences, Vol. 46 There is a growing consensus that ecological factors limit the geographic range of all organisms (e.g., Udvardy 1969; MacArthur 1972). Rotramel (1973:229) expressed it thusly: . . . biogeographic areas originate from and are maintained by the interactions of organisms with physical and biotic factors in their environments. He noted a lack of placing proper emphasis on ecological factors in biogeographic analysis, which he attributed to historical influences, and concluded that. . continued progress in solving the questions of the origins of biogeographic areas will require biogeographers to clearly distinguish the origins of species from the origins of areas and then develop new methods of eco-geographic analysis (Rotramel 1973: 230). The ecogeographic characteristics of a species distribution can be viewed as the present summation of the continuous evolutionary process of interaction and compromise that occurs between that species and its environment. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical...

### Reviews

*Very beneficial for all type of folks. It can be rally intriguing throgh studying time. You will like how the writer publish this ebook.*

-- **Nathan Cruickshank**

*Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.*
